

# Chapter 13 Review

## Chapter Test

### Check Your Knowledge

**Multiple Choice** Copy the number of each sentence below on a sheet of paper. Choose the letter that best completes the statement or answers the question.

- If you have a blowout, which action should you avoid?
  - ease up on accelerator
  - pull off onto the shoulder slowly
  - brake hard
  - turn on hazard lights
- Which action should you take first if the accelerator sticks while you are driving?
  - shift into a lower gear
  - turn off the ignition
  - apply the parking brake
  - kick the side of the accelerator
- To avoid a side-impact collision, you should
  - lock your brakes.
  - brake or accelerate quickly.
  - steer to the left.
  - steer to the right.

**Completion** Copy the number of each sentence below. After each number, write the word or words that complete the sentence correctly.

- An engine \_\_\_\_\_ when it has too much fuel and not enough air.
- Vehicle fires generally start in the \_\_\_\_\_.
- When water collects in roadway cracks, \_\_\_\_\_ can develop.
- A \_\_\_\_\_ collision produces the greatest force of impact of any collision.

### Review Vocabulary

Copy the number of each definition in List A. Match the definition in List A with the term it defines in List B.

#### List A

- devices that hold the wheel to the vehicle
- steer in the opposite direction
- sudden loss of tire air pressure while driving
- hand-operated device used to lift and hold one corner or side of the vehicle
- loss of braking effectiveness caused by overheating of the brakes after long, continuous, hard braking
- back and forth swerving of the rear of a vehicle

#### List B

- |                |                 |
|----------------|-----------------|
| a. jack        | d. brake fade   |
| b. fishtailing | e. countersteer |
| c. lug nuts    | f. blowout      |

### Think Critically

Write a paragraph to answer each question.

- You are driving in a residential area and identify a vehicle in your right-front zone backing out of a driveway. You hit your brakes hard, but your vehicle does not slow or stop. What steps should you take?
- You are involved in a collision on the freeway in a neighboring state. You are not hurt but are not sure about the driver of the other vehicle. What should you do?
